**Scoring Questions:** Your plan is scored using responses your enrollees provided to these questions. Your plan receives four overall scores for Health Plan, Health Care, Personal Doctor, and Specialists. Your plan also receives scores for the following eight composite areas: Getting Care Quickly, Getting Needed Care, Getting Information in a Needed Language or Format, How Well Doctors Communicate, How Well Doctors Coordinate Care and Keep Patients Informed, Getting Information About the Health Plan and Cost of Care, Health Plan Customer Service, and Enrollee Experience with Cost.

**Screener Questions:** These survey questions are used to screen respondents in answering the Scoring Questions. For example, in asking the respondent to evaluate the level of ease in receiving care, a respondent is first asked, "How many times did you go to a doctor's office or clinic for care?". Screener questions are not scored.

**About-the-Enrollee Questions:** These are questions from the About You section of the survey, where enrollees are asked about their age, education, race, health, lifestyle, etc.

**Survey Disposition:** This section reports general survey administration statistics, such as rates and breakdown of responses by administration modes.

*Notes:*

---

- Cells with frequency counts fewer than 11 are no longer suppressed in 2019 QI Reports.
- Individual response counts to Race (Q66) and Help (Q68) questions may add up to exceed Total Responses, as respondents are allowed to select multiple responses.
- The survey response rate, displayed at the top of this page, is calculated using suggested definitions from American Association for Public Opinion Research (AAPOR). See Section 3.5 in the Quality Improvement Reports Methodology Guide.
- Question-level response rates (the percentages listed under "Total Responses" for each survey question) are calculated as the number of non-missing responses divided by the number of completed surveys.
- Final disposition rates are calculated as the number of surveys belonging to a particular disposition divided by the number of total surveys sent according to the sampling frame.
- Please note the change in survey question numbers when comparing 2018 and 2019 survey results.
- Further details on terminology and methodology are provided in the Quality Improvement Reports Methodology Guide.

### Note(s):

Response rates for select questions on the 2019 QHP Enrollee Survey have been minimally impacted by a survey vendor programming error; your reporting unit was not affected by this data collection error. This error resulted in select questions being omitted from surveys administered via telephone for 41 reporting units in the 2019 QHP Enrollee Survey.
