The primary logo utilizes the full color symbol with purple for the logotype. It can also be used in black and white. Color variations are shown below. Ensure there is sufficient contrast with the background when using the logo.

Pay close attention to the legibility of "nevada" when using the logo at small sizes. All logo components must maintain their scale in relation to one another. As one component gets larger, the others get proportionally larger. Do not alter these proportions when reducing or enlarging the logo.

Due to anti-aliasing, some characters may not be legible, for example, at 72px vs 70px.

Campaign Colors

Typography

The HIX Open Enrollment Campaign uses the type family Whitney for all headers and subheads. Both headers and subheads are tracked to -30.

Whitney is a clean, sans-serif typeface that was designed specifically for legibility. It has sturdy, compact letters that make it an appropriate typeface for both print and signage. It's specifically designed to work in crowded environments and to be legible from a distance. Open Sans light is used for all body copy.
